

## NEW: INTENSE MOISTURE FORMULA

THE NEW GENERATION OF MOISTURE CARE – WITH DOUBLE EFFECT FROM INSIDE AND OUTSIDE.

### 24-HOUR CARE FOR MOISTURE-DEFICIENT SKIN

Efficient intensive moisture care which hydrates down to the lower epidermis layers. After a few days already, skin appears visibly fuller and smoothed. The vitalizing scent and the gentle formulation impart a wonderful feeling of freshness.

### 24-HOUR CARE FOR MOISTURE-DEFICIENT, DRY SKIN

Besides the main ingredients, this rich, lubricating formulation contains precious avocado oil. It helps to keep skin supple. Dry skin is optimally protected and supplied with moisture round the clock.

### EYE CARE

Intensive moisture for the delicate, sensitive eye contour tissue. The additional ingredient Sesaflesh®, a sesame protein, has a particular moisturizing effect and convinces with its firming instant effect.

### BASIC MOIST

An ultra light moisturizing fluid which is instantly absorbed. Its highly concentrated ingredients Hydroforte, green algae extract and aloe vera concentrate supply skin with lavish moisture and smooth and firm its tissue. After a short time already, skin becomes silky soft.

# THE REVOLUTION IN MOISTURE CARE

INTENSE MOISTURE FORMULA FROM BIODROGA SYSTEMS FILLS SKIN'S WATER DEPOTS.

## WATER – THE BEAUTY ELIXIR

Water is fundamental for life and a prerequisite for a well-functioning, fresh and full skin. The more moisture is available in the deeper skin layers, the more elastic and radiant appears the complexion.

# PERFECT HYDRATION

OF SKIN WITH INSTANT AND DEPOT EFFECT.

## OPTIMAL MOISTURE SUPPLY – ABSOLUTE WELLNESS FEELING

The future-oriented concept of the new skin care INTENSE MOISTURE FORMULA enhances the natural hydration mechanisms in skin cells and at the same time provides hydration through powerful moisturizers – a double effect for the perfect hydration from inside and outside. This double effect is due to the innovative ingredients which directly stimulate the aquaporines within skin.

Aquaporines are proteins which form channels in the cell membrane and control the water transportation within skin. The significant role of the discovery of these proteins was awarded in 2003 with the Nobel Prize. Their water conductivity reaches a value of 3 milliard molecules per second. This way, more moisture is conveyed to the upper skin layers.

Simultaneously, skin is supplied with intensive moisture from outside, its moisture-binding capacity is increased and it is protected against dryness.

The result: optimal care of thirsty skin with best skin tolerance.

## PRINCIPAL INGREDIENTS

MADECASSOSIDE, an innovative moisturizing agent, gained from the Madagascan tiger grass, stimulates aquaporines and filaggrin. Aquaporines are responsible for the optimal transportation of skin's own moisture within the skin while filaggrin protects skin against moisture loss.

SPECIAL BETA-GLUCANES bind large quantities of water and protect skin against dryness. Skin's moisture balance is stabilized, its protective functions are strengthened.

PASSION FRUIT OIL from the seeds of the Amazonian passion fruit is rich in precious linolic acid and provides for an intact protective skin barrier.

CODIAVELANE®, a new generation of moisturizers, gained from a Breton green alga, supplies instant and intensive moisture down to the lower layers.

FUGOCEL®, an extract from maize and soy, improves skin's moisture balance by up to 79%, imparting more smoothness and suppleness.

## EFFECT:

- conditioning formulation with maximum moisturizing effect
- optimal moisture supply from outside
- activation of hydration within the skin
- stabilizes skin's moisture balance
- with instant and long-lasting effect
- plumps up lines and wrinkles caused by dryness
- imparts a visibly fuller skin
- intensive moisture effect confirmed by 86% of all test persons (application test with 50 test persons)
